

A dark blue, textured armchair with wooden legs is the central focus. The chair is positioned in a room with a window in the background, showing light coming through sheer curtains. To the right, a white door with a decorative panel is visible. The floor is made of light-colored wood. The word "ANYWAY" is overlaid in large, white, bold, sans-serif capital letters across the middle of the chair.

ANYWAY

ANYWAY SOFA SYSTEM

After five years of evolution, we believe that we have developed a uniquely dynamic and streamlined process which results in interesting, relevant and attractive furniture for our times. Our new Anyway Sofa is the perfect example.

With a carefully considered and engineered selection of elements, the Anyway Sofa System can be built in a wide range of configurations. It can accommodate internal and external bends of both 30deg and 90deg. A high level of comfort is achieved through its sprung and angled seat, together with a contoured backrest - which can be high or low as desired.

With two options for seat height, and a variety of leg finishes in wood and metal, the Anyway Sofa will adapt perfectly to any requirement, allowing you maximum flexibility when furnishing your space. Slim and streamlined, the seating modules will snake through any environment - reception areas, restaurants, hotel lobbies, and more. And always with an air of natural panache.

We see the Anyway Sofa as a tool for generating the most out of a space, when and wherever you are in need of some elegant, comfortable contemporary seating.

ANYWAY – STEP BY STEP

The Anyway sofa system is highly adaptable and has the ability to blend in or stand out in any environment, as desired. These key points will help you to achieve your vision – whichever that may be...

1. THE PLAN

The Anyway sofa adapts itself to follow interior walls – or creates dynamic freestanding islands. Use our 3D and 2D CAD files to configure your interior space in plan view.

2. SEAT HEIGHT

Choose between 46 or 42cm seat height. Fast moving, high traffic environments may benefit from the higher alternative. A more relaxed lounge experience will be achieved with the lower.

3. BACKREST

The Anyway sofa comes with two options for backrest height. Choose more privacy with the high back, go for airy transparency and openness with the low version or combine both expressions in the same sofa.

LOW BACK

HIGH BACK

HIGH BACK WITH SIDE PANEL

HIGH BACK, NO SIDE PANEL

4. SIDE PANELS

The side panel incorporates the armrest and is the perfect way to “close” your sofa. Alternatively omit this component and leave your sofa open ended.

LOW BACK WITH SIDE PANEL

LOW BACK, NO SIDE PANEL

5. MATERIALS

The Anyway sofa works well with a wide variety of fabrics, including our standard range. It can be complemented with legs in a selection of wood and metal finishes.

METAL LEGS

WOODEN LEGS

ANYWAY ARMCHAIR (AN-05)
Low back, upholstered
armchair with legs in wood
and metal. W:72 D:70 H:76/80
